

CLASS SPECIFICATION FOR:

Project Specialist II

General Statement of Duties:

Manages routine and moderately complex projects to completion; reviews and comments on project plan designs for constructability and compliance; ensures work completed for assigned projects adheres to all approved plan specifications and applicable regulatory specifications and requirements; inspects and approves work underway and completed at project worksites; recommends payments and bond releases; does related work as required.

Distinguishing Features of Class:

An incumbent in this classification would be assigned to a specific division managing multiple types of moderately complex division-specific projects to ensure compliance with all relevant and well-established project specifications and related regulations. Primary duties include proficiently performing all the duties assigned to Project Specialist I plus inspecting assigned projects for relevant land disturbance activities, drainage, stormwater management, erosion and sedimentation control and compliance; accurately identifying compliance and other project issues in a timely manner; working collaboratively with contractors, other stakeholders and the supervisor to identify viable options to resolve identified issues; ensuring approved solutions are properly implemented; preparing and maintaining related and required documentation and reports; recommending payment and/or bond releases based on approved schedule; attending and/or coordinating project meetings. Work is performed under limited supervision. Researches and resolves, or recommends resolution, of a variety of routine and moderately complex problems or questions independently with unusually complex issues referred to the supervisor or other appropriate Department or County staff.

Examples of Assigned Duties (*illustrative of the types and scope of duties and responsibilities assigned to positions in this class*):

- Develops and maintains a thorough working knowledge and understanding of the assigned department's division-specific projects and County project management policies and practices which may include purchasing and payments, materials management, relevant regulatory requirements, and best management practices specific to the types of projects managed;
- Based on assigned division, projects may include any of the types of projects assigned to level I plus any of following: bridges, larger and moderately complex construction and CIP projects, natural gas, streams and creeks, wetlands, multiphase projects, BMP, commercial, industrial, landfill, mine, mitigation bank, massive clearing and grading, or other projects as assigned;
- Provides day-to-day oversight of assigned division-specific project details in relation to all aspects of approved construction and mandated compliance requirements;
- Proficiently performs routine and moderately complex division-specific project management duties including compliance inspections and enforcement activities and other project related duties independently;
- Depending on assigned division, duties may include level I duties and any of the following: serving as Radiation Safety Officer, conducting field surveys, material procurements, oversight of contracted work, bridge inspections, right of way permitting, MS4 inspection, conducting investigations and issuing violation notices, performing field surveys, performing Certificate of Occupancy (CO) inspections and releasing related permits, calculating payments, coordinating bond releases, etc.;
- Reviews and interprets project plans and revisions and provides appropriate comments;
- Actively participates in all project meetings with various departments, County, and other internal and external stakeholders to review projects plans and specifications, identify issues, resolve identified issues, and to ensure project compliance with all applicable technical and regulatory requirements;
- Makes compliance determinations using thorough working knowledge, accurate interpretation and application of division and project specific compliance requirements, regulatory requirements, and the project plans while on the worksite or in the field;
- Schedules and conducts field/site meetings with relevant project participants;
- Identifies and responds to project issues, researches and identifies viable options, collaborates with supervisor, contractors and other relevant stakeholders to make appropriate decisions, and oversees the implementation of approved solutions;
- Researches and resolves, or recommends resolution, of a wide variety of complaints, problems, concerns and questions from citizens and other internal and external stakeholders related to assigned projects;
- Appropriately involves and collaborates with the supervisor, appropriate department staff, or other County staff for assistance with the resolution of unusual, complex or politically sensitive complaints and/or issues;
- Cross trains to handle additional and more complex types of projects and inspections within assigned division;
- Follows all required policies and procedures and accurately creates and maintains detailed information, records and reports for assigned projects;
- Attends public hearings, may present information, answers questions and follows-up as needed in a timely manner;
- Actively participates in all division and department and other relevant scheduled meetings and trainings;
- Obtains and maintains all required licenses and certifications;
- May be required to work a flexible schedule;
